

## **Year Round Vegetable Production (IHT-106)**

### **DURATION - 5 DAYS**

#### **Introduction**

Importance and Advantages of Year Round Production of Vegetable Crops

#### **Classification of Vegetables**

On the Basis of Season and Botanical Families

#### **Selection of Varieties**

Selection of Heat/Cold Tolerant and Day Neutral Cultivars

#### **Nursery Management**

Starting Early Nursery in Protected Structures  
Soil and Soilless Seedling Production in Protray

#### **Off Season Vegetable Cultivation**

Taking Advantage of Local Climate  
Use of Low Cost Poly House like NVPH  
Cultivation in Low Poly Tunnels  
Diara Cultivation

#### **Integrated Pest/Disease Management**

Identification of Suitable IPM Practices for Off-season Cultivation

#### **Postharvest Handling and Marketing Opportunities:**

Washing, Sorting and Grading  
Export to Distant and Local Markets
