

## **Quality Vegetable Production (IHT-104)**

**DURATION - 5 Days**

**Introduction:** Importance and Advantages of Year Round Production of Vegetable Crops

**Classification of Vegetables:** On the basis of Temperature, Season and Botanical Families

**Selection of Varieties:** Selection of Heat/Cold Tolerant and Day Neutral Cultivars

### **Nursery Management**

Starting Early Nursery in Protected Structures

Soil and Soilless Seedling Production in Portrays for Early Crop Production

**Production Technology:** Round the Year Vegetable Cultivation

**Integrated Pest/Disease Management:** Identification of Suitable IPM Practices for Off-Season Cultivation

### **Postharvest Handling and Marketing Opportunities**

Washing, Sorting and Grading

Export to Distant Market and Local Markets
